PROFILE

A.S. Computer Information Systems graduate (May 2026) with hands-on experience in robotics instruction, web development, and networking. Maintains a personal distributed AI home lab covering Linux, SSH, VPN mesh networking, and full-stack dashboards. Seeking an entry-level Help Desk or IT Support role as a foundation for a career in cybersecurity.

EXPERIENCE

Robotics Lead Instructor

Aug 2025 – Present

USEL Engineering League · Part-time

- Design and deliver STEM robotics curriculum to K–8 students covering programming logic, mechanical assembly, and engineering problem-solving
- Manage multi-session classroom operations, track student progress, and coordinate with parents and school staff

Forklift Operator

Jun 2022 – Nov 2023

NRI Group · Chino, CA

- Managed high-volume shipping and receiving; maintained inventory accuracy using RF scanners and warehouse management software

Warehouse Operations Associate

Apr 2018 – Mar 2020

Owens & Minor · Ontario, CA

- Promoted to forklift operator within first year; earned multiple equipment certifications and consistently exceeded order-picking targets

EDUCATION

A.S., Computer Information Systems

Expected May 2026

Chaffey College · Rancho Cucamonga, CA

- Certificate in Web Development (2023)
- Coursework: Computer Networking, Cybersecurity Fundamentals, Python, C++, JavaScript, Data Structures

TECHNICAL SKILLS

Comfortable with: Python, HTML5, CSS3, Git / GitHub, Microsoft Office

Exposure to: JavaScript, C++, Linux (Ubuntu / Raspberry Pi OS), SSH, Bash, TCP/IP, Tailscale VPN, hardware troubleshooting

CERTIFICATIONS

- Web Development Certificate — Chaffey College, 2023
- Forklift & Equipment Operator — multiple certifications
- CompTIA A+, Network+, Security+ — in progress (2026 target)

PROJECTS

Neuron — Distributed AI Home Lab

2024 – Present

Personal Project

- Deployed a multi-node AI system (Raspberry Pi 5, RTX 4090, RTX 5070 Ti) with Tailscale VPN mesh, SSH tunneling, FastAPI backend, Wake-on-LAN, and HTTPS reverse proxy
- Built a real-time web dashboard for GPU/CPU monitoring, node management, and cross-machine file transfers
